## PRESS RELEASE

### QLOCKTWO Baselworld Novelties

#### The new dimension

The successful QLOCKTWO family by Biegert & Funk has grown considerably. Thanks to its formidable size of 180 x 180 cm, the QLOCKTWO 180 glows widely visible with its displayed time in words.

The QLOCKTWO W watch now has a big sister, the QLOCKTWO W 39.

#### QLOCKTWO 180

*The perfect combination of large-scale presence and minimalistic design. There have often been inquiries about a widely visible QLOCKTWO for large spaces. In Basel it can now be admired up close: With its dimensions of 180 x 180 cm it can indeed be seen from far away.*

“The unique statement of the word clock makes an everlasting impression from any distance, while creating a harmonizing and exhilarating effect, which also characterizes its smaller siblings”, says Marco Biegert.

The body is made of white painted wood and the time display can be remote-controlled. Using high-precision laser technology, the letters are cut into the metal, which is available in all RAL colours and 20 languages and can be produced individually as a Creator’s Edition upon request.

All QLOCKTWO 180s are handmade in the Biegert & Funk manufactory in Schwäbisch

Gmünd as part of an exclusive and individual production process.

## **QLOCKTWO W 39**

*A new watch with two new straps in the iconic QLOCKTWO design, measuring 39 x 39 mm.*

“Developing a bigger size for the QLOCKTWO W was long overdue”, says Andreas Funk. The size is indicated in the name of this model: 39 x 39 mm, hence QLOCKTWO W 39. The classic functions remain unchanged. At the touch of a button, the time is displayed, alternatively seconds or the calendar day.

The W 39 will be available in two different designs from September onwards

### *QLOCKTWO W 39 Black Steel*

Inside a black case is a black metallic matrix with precisely cut out letters. The watch is complemented by a matching black, DLC-coated Milanese bracelet.

### *QLOCKTWO W 39 Fine Steel*

Inside a stainless steel case is the stainless steel matrix with precisely cut out letters. The watch comes with a leather watchstrap.

## **QLOCKTWO Copper**

*New front with brushed copper surface / Available from spring 2017*

For thousands of years it has been one of the most important metals for mankind: Copper. Today, this element has become indispensable. In interior design it is currently enjoying a

---

# QLOCKTWO®

renaissance. Copper is a timeless natural material with a warm appearance.

The enthusiasm about this beautiful metal is shared by QLOCKTWO manufacturer Biegert & Funk from Schwäbisch Gmünd in Germany. From spring 2017 a new front cover with a brushed copper surface will be available for the multiple award-winning QLOCKTWO items. It is created by applying several layers of copper onto a magnetic stainless steel core in a galvanic process.

“This procedure ensures that the front can be fixed magnetically and thus invisibly, without compromising the typical look of this historical non-ferrous metal”, explain Marco Biegert and Andreas Funk, the two creative minds behind the young design classic.

The light shines through the letters that have been precisely cut out of the metal, creating the beautiful effect of displaying the time in words in a particularly aesthetic way. The satin sheen of the copper surface on the inner sides of the letters further reflects this glow and enhances the warm and comfortable atmosphere that the QLOCKTWO Copper exudes.

With its balanced appearance, the QLOCKTWO Copper harmoniously matches any environment.

The QLOCKTWO Copper is available now in sizes Classic and Large.

## **QLOCKTWO Creator's Edition Vintage Copper**

*QLOCKTWO Classic and Large in an especially eye-catching design with patinated copper surface.*

A lively, unique surface – that's what the designers of QLOCKTWO had in mind. Based on the QLOCKTWO Copper, they looked at the metal's different forms of appearance and were inspired by the naturally patinated copper on roofs, sculptures and coins.

Marco Biegert explains: "After a long test phase, we managed to patinate copper in a way that gives every single clock a completely unique surface meeting the high expectations of a Creator's Edition." The passionate diver Andreas Funk continues: "In some places, you can sense the bright colours of the copper and others are reminiscent of a bluish green submarine world."

It is a unique combination of technology and art. Using high-precision laser technology, the letters are cut into the vivid surface. Copper is then applied to the magnetic stainless steel core to ensure the front can be fixed invisibly.

"The QLOCKTWO Creator's Edition Vintage Copper provides a chance to tell the time and admire a unique piece of art", says Andreas Funk. A statement telling us to enjoy time.

The QLOCKTWO Creator's Edition Vintage Copper will be available from May 2017 in sizes Classic and Large.

## **QLOCKTWO in new colour Hazelnut**

The new powder-coated steel front Hazelnut sparkles in different ways, depending on light and angle due to metallic inclusions. “The new colour allows the QLOCKTWO to shine with an almost magical appearance which harmoniously blends with any interior design style”, says Marco Biegert. The QLOCKTWO Hazelnut is available now in sizes Classic and Large.

## **QLOCKTWO by Biegert & Funk**

Time is celebrated in a special way. The letters form words describing the time in five-minute intervals. “It is half past eight.” Every illuminated dot in a corner represents a minute that is added to the displayed time. The brightness can be set to suit individual preferences or it can automatically adjust to the surrounding light.

The QLOCKTWO tells time in more than 20 different languages.

Production started in 2009 and it quickly became clear that the inventors’ quest for perfection would also be the deciding factor for all employees, suppliers and components. Every detail is thought through and tested for functionality and quality. QLOCKTWO is produced in the factory in Schwäbisch Gmünd and there is a reason for it: “Handmade in Germany and the regional connection are part of our philosophy”, explains Marco Biegert.

More than a dozen international design awards and prizes, such as the Red Dot Design Award, the iF Product Design Award, the Good Design Award and the Plus X Award for functionality and

design, confirm that Marco Biegert and Andreas Funk are on the right tracks.

## **QLOCKTWO Family**

### **QLOCKTWO Classic**

Wall / table clock in the format 45 × 45 × 2 cm with a corpus made from white lacquered wood. With a front cover made from brushed stainless steel, matt powder coated stainless steel or polished acrylic glass in seven different colors.

An additional exclusive version is the QLOCKTWO Classic Carbon Fibre with a front cover made of carbon and a matt black lacquered body.

### **QLOCKTWO Classic Creator's Edition**

Numbered and laser-signed unique pieces of the wallclock. The front cover of the QLOCKTWO Creator's Edition Raw Iron is manufactured from raw steel. In the case of the QLOCKTWO Creator's Edition Rust, this raw steel is corroded with an elaborate process. The front cover of the QLOCKTWO Creator's Edition Gold is coated by hand with wafer-thin gold leaf; that of the QLOCKTWO Creator's Edition Platinum with pure platinum leaf.

### **QLOCKTWO Touch**

Table clock with alarm function measuring 13.5 × 13.5 × 1.8 cm. The body of the clock is made from a solid aluminium block. With a front cover made from brushed stainless steel or seven colors of polished acrylic glass. Furthermore available: QLOCKTWO Touch Deep Black with

black case and black coated front cover.  
QLOCKTWO Touch Golden Legend, case, stand and steel front cover coated with 24 carat fine gold.

## **QLOCKTWO Touch Creator's Edition Rust**

Numbered and laser-signed unique pieces of the table clock with alarm function in the dimensions 13.5 × 13.5 × 1.8 cm, with black case, black base and front cover made of hand-rusted raw steel.

## **QLOCKTWO Large**

The big sister of QLOCKTWO Classic measures 90 × 90 × 3.5 cm and comes with a front cover from brushed or matt powder coated stainless steel. Also available as Rust, Gold, Platinum and Raw Iron.

## **QLOCKTWO W**

The high-quality stainless steel case of the wrist watch is available in different finishes: brushed, polished, black DLC coated. The display is available in black, white, rhodium-plated, PVD rosé gold-coated or gold-plated stainless steel. For the QLOCKTWO W Golden Words version, the case, the Milanese bracelet and the dial are PVD-gold plated. The QLOCKTWO W comes with a leather or rubber strap in different lengths or a Milanese bracelet. It is available in eight languages.
